Convert PDF to Office in Salesforce

COPY PAGE

Nutrient Salesforce SDK is a client-side JavaScript library that's fully compatible with Lightning Web Components for converting PDF to Office documents directly in the browser, without the need for server-side processing. To convert PDF to Office document formats such as DOCX, XLSX, and PPTX, Nutrient Web SDK relies entirely on its own technology built from the ground up, and it doesn't depend on third-party tools such as LibreOffice or Microsoft Office.
