# Microsoft Teams PDF editor library

COPY PAGE

Nutrient Teams SDK is a powerful PDF editor library built with JavaScript for editing PDF documents directly in the browser. It's fully compatible with applications, and it provides developers with a robust PDF editing API for programmatic operations and a customizable, user-friendly PDF editor UI. This feature-rich solution makes it easy to perform a wide range of editing tasks, including annotations, page manipulation, and more, within any Microsoft Teams application.

LAUNCH DEMO

TRY OUR NO-CODE APP

Nutrient SDKs are trusted by world's most popular applications, including Autodesk, Disney, UBS, Dropbox, IBM, and Lufthansa. Nutrient's powerful solutions enable seamless integration of PDF editing features into your applications, delivering reliability and efficiency to world-class enterprises.

## Key capabilities

✦ Open, edit, save — Directly in Teams from a web browser

ASK AI

- ✦ **Annotations, forms, and bookmarks** — Create, edit, or delete annotations; manage PDF forms; and update bookmarks seamlessly using Nutrient's PDF editor library.
- ✦ **Page manipulation** — Rotate, merge, split, delete, or add pages to enhance PDF workflows with precision.
- ✦ **Client-side editing** — Edit PDFs directly in the browser with no server dependency.
- ✦ **Browser compatibility** — Nutrient's PDF editor library is fully compatible with all modern browsers and devices, ensuring a seamless experience across platforms.
- ✦ **Customizable user interface (UI)** — Tailor the UI to match your brand by hiding buttons, altering themes, and more.
- ✦ **Headless operations** — Programmatically edit PDFs without the UI for advanced use cases.
- ✦ **Extendable functionality** — Add advanced features like forms, digital signing, annotation tools, and more with ease.

## Guides for PDF editing
