WEB REDACTION TEAMS

Microsoft Teams redaction library

COPY PAGE

Nutrient Teams SDK is a JavaScript library for permanently redacting content in PDF documents stored in Microsoft Teams. It offers developers a robust API to automate redaction, as well as a beautiful UI for creating, previewing, and applying redactions in any Microsoft Teams application.

LAUNCH DEMO

TRY OUR NO-CODE APP

Nutrient SDKs are trusted by world's most popular applications, including Autodesk, Disney, UBS, Dropbox, IBM, and Lufthansa. Nutrient's powerful solutions enable seamless integration of PDF editing features into your applications, delivering reliability and efficiency to world-class enterprises.

Key capabilities

- ✦ Open, redact, save — Directly in Teams from a web browser
- ✦ Create, preview, apply — Programmatically or using the UI

ASK AI

- ✧ **True redaction** — Permanently remove content (not just obscure it)
- ✧ **Search and redact** — For strings, preset patterns, or regex
- ✧ **Client-side** — Redact directly in the browser (no server needed)
- ✧ **Customizable** — Trigger workflows, adjust colors, and overlay text
- ✧ **Browser support** — Works on all modern browsers and devices
- ✧ **Extendable** — Add editing, bookmarks, OCR, and more
