Sync PDF form field values using Instant JSON

Types

This section explains how to use type declarations in Instant JSON records.

The optional keys are specified as follows:

```
{ optionalKey?: value; }
```

To reduce payload size, omit optional keys when their values are undefined.

Form field values

Form field values were added as new Instant types to sync form field values across different devices.

The `name` of a form field value must always be the *fully qualified name* of a PDF form field:

JSON

JAVASCRIPT

```
1 // Example of the Instant JSON schema of a form field value:
2 {
3   "name": "Client name",
4   "type": "pspdfkit/form-field-value",
```

ASK AI

```
5     "v": 1,  
6     "value": "PSPDFKit"  
7 }
```
