Transitioning from PSPDFKit Server to Document Engine

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

Make sure you've set the `Authorization` header to `Token token=<secret>`, where `<secret>` is the API authentication token you have set in your `docker-compose.yml` file with the `API_AUTH_TOKEN` environment variable.

! Important: The server API should only be accessed from your backend servers and not by the clients. Giving the API authentication token to clients is a security concern. More information about how PSPDFKit Server is secured can be found in the [PSPDFKit Security](#) guide.
