# Transitioning from PSPDFKit Server to Document Engine

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

The server where PSPDFKit Server is installed will need to connect to `https://my.pspdfkit.com` for activation. Make sure to also allow requests to subroutes of this URL, such as

`https://my.pspdfkit.com/api/*`. The port is the default port for HTTPS connections, 443.
