Deploy document engine with Kubernetes seamlessly

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

[Kubernetes](#) is an open source container orchestration engine for automating deployment, scaling, and management of containerized applications. Since PSPDFKit for Web Server-Backed is shipped as a Docker image, you can deploy it on Kubernetes.

For more details, see our guides for how to deploy PSPDFKit on [Google Cloud Platform](#) and Microsoft Azure.
