# Authenticate clients with JWT validation guide

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

If you're having trouble authenticating your clients, you can validate your JWT in the PSPDFKit Server Dashboard. This lets you check if you're missing any claims and if your JWT is in the correct format.

If you're testing PSPDFKit Server locally, you can follow the [setting up PSPDFKit Server](#) guide and access the JWT validator at <http://localhost:5000/dashboard/jwt-validation>. To use it, paste the JWT into the text field. The validation result appears instantly:

Paste your encoded JWT here:

```
eyJhbGciOiJSUzI1NiIsInR5cCI6IkpXVCJ9.eyJwZXJtaXNzaW9ucyI6WyJyZWFiLW9hZCJkb2N1bWVudF9pZCI6IjdlLULZBRjJTQzVONTREMLFDQzNQM01NSk1TIiwibGF5ZXIiOiJZnjdRX216elk0WW1FWDDaN195YjlrIiwiaWF0IjoxNjE5MDM5MDczLCJleHAiOjE2MTkyOTEyNzN9.HvDlnw-
```

Validation result:

**JWT is valid.**

```
{  "document_id": "7KRVAf2SC5N54D2QCC3P3M",  "exp": 1619291273,  "iat": 1619032073,  "layer": "Y67Q_mzzY4YmEX7Z7_yb9Q",  "permissions": [    "read-document",    "write",    "download"  ]}
```

For more information on how client authentication works with PSPDFKit Server, check out our [guides](#).
