# Migrate from PSPDFKit Server to Document Engine

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

PSPDFKit Server is a language-independent REST API, which means it supports all languages and platforms, including ASP.NET, PHP, Ruby, Java, etc...

Your backend must be able to generate valid [JSON Web Tokens \(JWTs\)](#) for authentication. PSPDFKit Server is using the standardized JWT format. The benefit of this format is that it has countless implementations in all different programming languages.
