# Transitioning from PSPDFKit Server to Document Engine

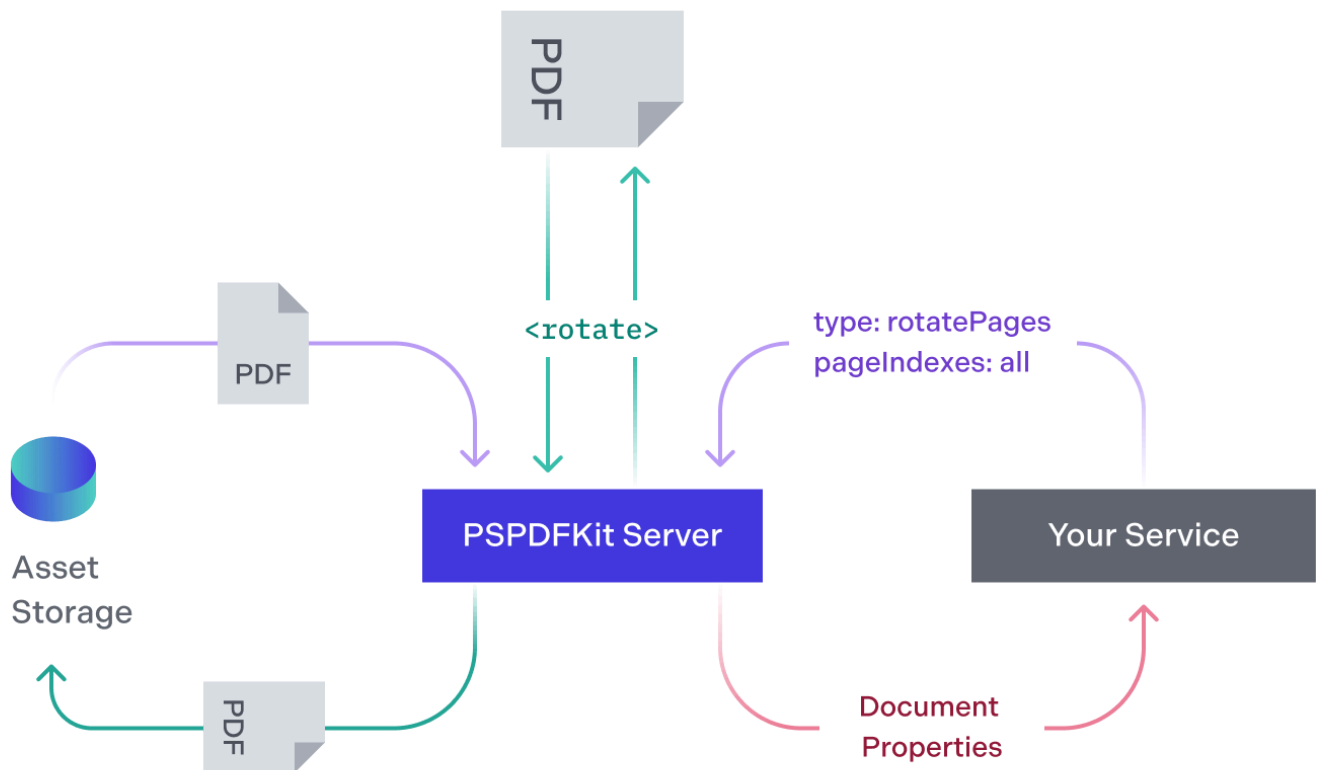

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

When you edit a document — for example, by rotating all pages — PSPDFKit Server saves a new asset for that document and updates all relevant annotations.

ASK AI

- 1 Your service requests that the Server rotates all pages of the document. PSPDFKit Server retrieves the document from the asset storage for processing.
- 2 PSPDFKit Server transforms the document, rotating all of its pages.
- 3 PSPDFKit Server persists the transformed document in the asset storage without deleting the original. It returns the new document's properties to your service.
