# New features in PSPDFKit for Web 2018.5

[PSPDFKit for Web 2018.5](#) adds image annotations to place arbitrary images on a PDF page, along with two new sidebar modes — one to show the table of contents (document outlines) of a PDF, and one that lists all annotations. It also includes a new option to create annotation variants with the new ink highlighter and arrow tools enabled by default, plus a whole lot more!

## Notable changes

- ✧ We changed the `verticalAlign` attribute value of text annotations from `middle` to `center` in our [JSON spec](#).
- ✧ We added support to configure the amount of database connections via the `DATABASE_CONNECTIONS` environment variable.

## Migrate PSPDFKit for Web

For more information, please take a look at the [PSPDFKit for Web 2018.5 migration guide](#).

For a full list of changes, check out the [changelog](#).
