Find your current PSPDFKit Server version

PSPDFKit Server has been deprecated and replaced by [Document Engine](#). To migrate to Document Engine and unlock advanced document processing capabilities, refer to our [migration guide](#). Learn more about these enhancements on our [blog](#).

If you are unsure about the version of PSPDFKit you are using, you can easily find out.

[Open the dashboard](#) to see the currently running server version, which is shown in the blue box.

The Docker version is often important and can be seen by typing `docker version` in the terminal. A typical output could be:

ASK AI

```
1 Client:
2   Version:      17.06.0-ce
3   API version:  1.30
4   Go version:   go1.8.3
5   Git commit:   02c1d87
6   Built:        Fri Jun 23 21:31:53 2017
7   OS/Arch:      darwin/amd64
8
9 Server:
10  Version:      17.06.0-ce
11  API version:  1.30 (minimum version 1.12)
12  Go version:   go1.8.3
13  Git commit:   02c1d87
14  Built:        Fri Jun 23 21:51:55 2017
15  OS/Arch:      linux/amd64
16  Experimental: true
```

See the [docker version](#) section in Docker docs for details.
