Customizing toolbar icons and buttons in our UWP viewer

Nutrient UWP SDK includes five redaction-related icons to help you better customize the interface of your application.

They can be located and used through the `ms-appx-web:///PSPDFKit/Assets/Redactions/icon_name` URI and are named as follows:

- ❖ `redaction.svg`
- ❖ `redaction_preview.svg`
- ❖ `redaction_personal_information.svg`
- ❖ `redaction_string_matching.svg`
- ❖ `redaction_string_search.svg`

The icons make it easy to create [custom toolbar buttons](#) to better fit your needs. You can find an example on the redactions page of our [UWP Catalog](#).
