# Sync PDF form field values using Instant JSON

COPY PAGE

## Types

This section explains how to use type declarations in Instant JSON records.

The optional keys are specified as follows:

```
{ optionalKey?: value; }
```

To reduce payload size, omit optional keys when their values are undefined.

## Form field values

Form field values were added as new Instant types to sync form field values across different devices. The `name` of a form field value must always be the *fully qualified* name of a PDF form field:

ASK AI

```
// Example of the Instant JSON schema of a form field value:
{
  "name": "Client name",
  "type": "pspdfkit/form-field-value",
  "v": 1,
  "value": "PSPDFKit"
}
```
